About Us

Welcome to **PortiQ Automations Pvt. Ltd.**, your trusted partner in entrance automation solutions. Since our inception, we have been committed to revolutionizing the way businesses and homes manage their entry points, offering a seamless blend of innovation, security, and convenience.

At **PortiQ Automations**, we specialize in the design, manufacture, and installation of advanced entrance automation systems. Our product range includes automatic gates, doors, barriers, and access control solutions, all engineered to the highest standards of quality and reliability. Whether it's for residential, commercial, or industrial applications, our solutions are tailored to meet the unique needs of each client.

Established in the year **2024**, "**PortiQ Automations Pvt. Ltd.**" is a distinguished automatic entrance systems & solutions provider.

We are recognized amongst our clients for coming up with innovative solutions for their needs and demands by blending creativity and technological excellence.

Our complete range of product portfolio is suitable for internal and external use in residential, commercial and industrial buildings.

Our approach of understanding our customer's requirements and a balanced proportion of creativity and technical know-how determine our scope of work.

With our expertise we provide unconventional solutions to our clients.

Smart Partnership

Collaborating with industry leaders, we develop innovative technologies, methods, models, and policies that will shape the future of the automation industry for all users.

Our Mission

Our mission is to enhance the safety, security, and efficiency of your property through cutting-edge automation technology. We aim to provide solutions that not only meet but exceed your expectations, ensuring ease of use, durability, and exceptional performance.

Our Vision

We envision a world where smart automation is a standard feature in every property, enhancing everyday life with innovative technology that is both intuitive and dependable. Our vision drives us to continuously innovate and improve our products and services to stay ahead in the ever-evolving field of automation.

**Empowering your
entrance with smart
automation for
unmatched security
and ease.**

Why Choose Us?

- **Innovation & Quality:** We leverage the latest technology to deliver state-of-the-art automation solutions that are both robust and user-friendly.
- **Customer-Centric Approach:** Our clients are at the heart of everything we do. We work closely with you to understand your specific requirements and deliver customized solutions.
- **Expert Team:** Our team of skilled engineers and technicians are dedicated to ensuring the highest levels of service and support, from consultation to installation and beyond.
- **Comprehensive Solutions:** We offer a wide range of products and services to meet all your entrance automation needs, ensuring seamless integration and optimal performance.

Our Products

PortiQ Automations has a complete range of smart, high-quality automated entrances and doors with distinctive design.

INDUSTRIAL ENTRANCE AUTOMATION

COMMERCIAL ENTRANCE AUTOMATION

RESIDENTIAL ENTRANCE AUTOMATION

DOCKING BAY & WAREHOUSE SOLUTION

The image features a low-angle, upward-looking view of a modern industrial building's entrance. The entrance is a large, dark, recessed area with a textured, horizontal-slatted facade. The surrounding walls are light-colored with a fine grid pattern. A large, stylized red arrow graphic is overlaid on the image, pointing upwards and to the right, starting from the bottom left and ending near the top right. The bottom portion of the image is a solid dark grey/black background where the text is located.

INDUSTRIAL ENTRANCE AUTOMATION

Applications

Factories, Industrial plants & Warehouses.

AUTOMATIC ROLLING SHUTTERS

Automatic Rolling shutters are versatile window and door coverings, consisting of horizontal slats that can be conveniently rolled down for protection, insulation, and security. Characterized by high quality components & well-conceived design they perfectly match architecture of any building.

INDUSTRIAL SECTIONAL DOORS

Industrial Sectional Doors are made up of multiple panels that open vertically and then lay parallel with your Industrial ceiling when in the open position. Specifically designed to suit the modern industrial architecture which guarantee maximum security and reliability.

RETRACTABLE GATES

Retractable gates are typically installed as an additional comprehensive security system for a guarded site. Unlike barrier gate systems, retractable gates are not capable to be used like an automated door that closes and opens at will.

HIGH SPEED DOORS

High-speed doors are rapid-operating doors designed for environments requiring quick access and frequent use, enhancing workflow efficiency and maintaining climate control. Commonly used in industrial settings, these doors improve energy savings and reduce contamination risks by minimizing open times.

AUTOMATIC BOLLARDS

Automatic bollards are retractable, motorized posts used to control vehicle access and enhance security in various settings. They can be raised or lowered automatically via remote control, sensors, or access control systems, providing a flexible solution for traffic management and perimeter protection.

COMMERCIAL ENTRANCE AUTOMATION

Applications

Offices, Hotels, Showrooms, Embassy, Hospitals, Shopping Complex, Public Establishments etc.

AUTOMATIC SLIDING DOORS

Automatic sliding doors are doors that open and close by sliding horizontally along a track, activated by motion sensors, push buttons, or other control systems. They provide hands-free, convenient access and are commonly used in commercial buildings, hospitals, and airports for improved accessibility and traffic flow.

AUTOMATIC SWING DOORS

Automatic swing doors are doors that open and close by swinging on hinges, activated by sensors or push buttons for hands-free entry and exit. Our automatic swing doors allow users to experience easy and fast automation with smooth and noise less function even in the space constraints areas.

AUTOMATIC SLIDING GATES

Automatic sliding gates are ideal for residential, commercial, and industrial properties where space is limited and secure, convenient access is needed. They offer smooth operation, enhanced security, and are space-efficient as they slide parallel to the fence or wall.

TRIPOD TURNSTILES

Tripod turnstile is a gate with three rotating arms that allows one person to pass at a time, used for controlled access in areas like public transport, office buildings, and events. It enhances security by integrating with access control systems to permit or restrict entry.

AUTOMATIC FLAP BARRIERS

Automatic flap barriers are access control gates with retractable flaps that open and close automatically to allow or restrict entry, often found in places like metro stations, office buildings, and secure facilities. They enhance security by integrating with systems like card readers and biometric scanners.

AUTOMATIC BOOM BARRIER

An automatic boom barrier is a motorized gate with a horizontal bar that rises and lowers to control vehicular access, commonly used in parking lots, toll plazas, and secure entrances. It enhances security and traffic management by integrating with access control systems.

FULL HEIGHT TURNSTILES

Full-height turnstiles are tall, revolving gate systems that allow only one person to pass at a time, providing high security by preventing unauthorized entry. Commonly used in high-security areas like prisons, stadiums, and industrial sites, they integrate with access control systems for enhanced regulation.

SPIKE BARRIER/ TYRE KILLERS

Spike barriers, or tyre killers, are security devices installed on roadways to prevent unauthorized vehicle access by deploying spikes that puncture tires if crossed. These barriers are commonly used in high-security areas such as military bases, airports, and restricted zones to enhance perimeter security and control traffic.

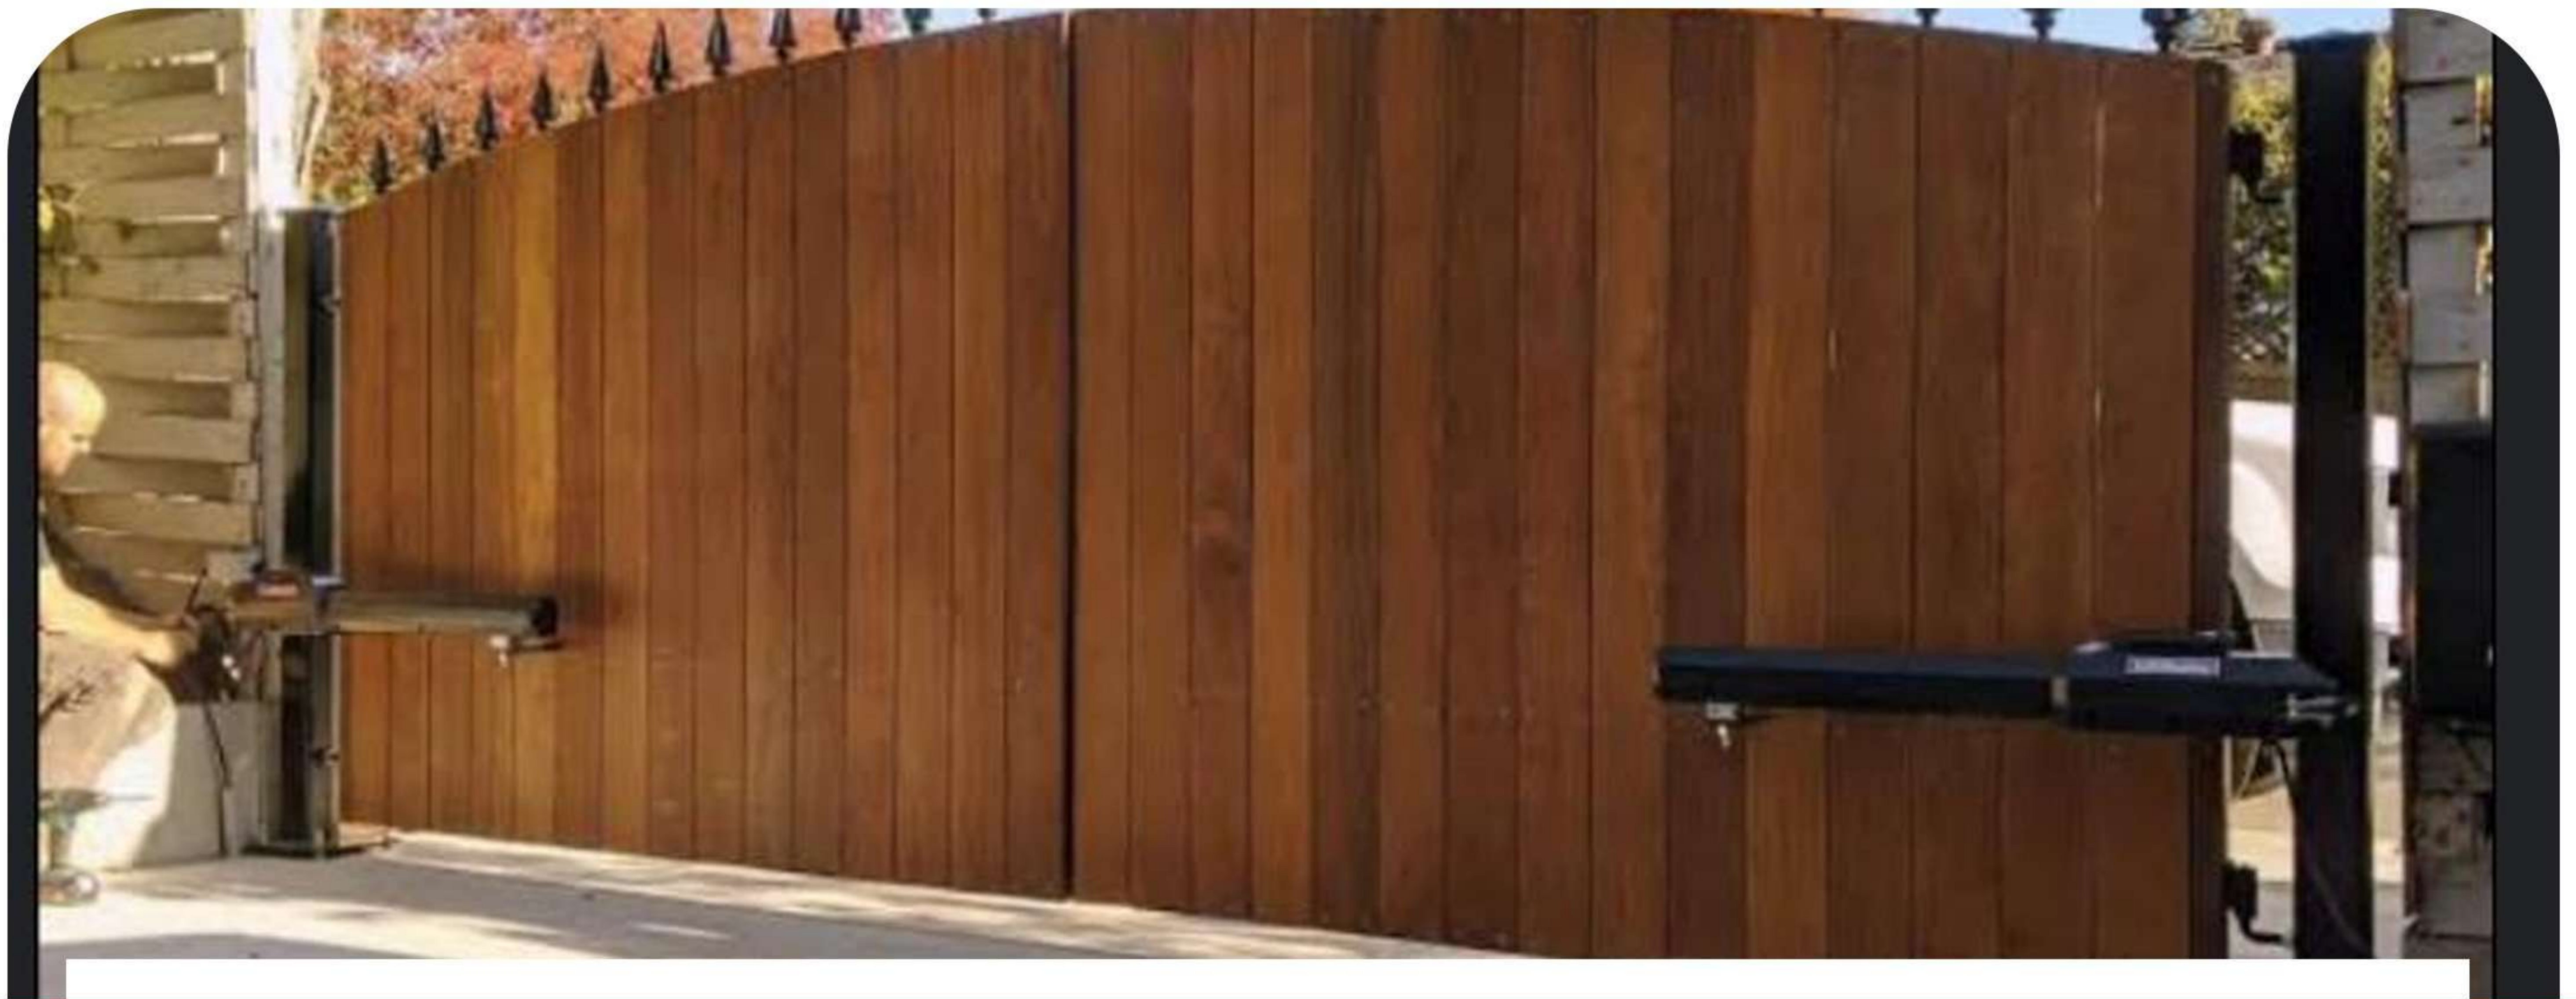

RESIDENTIAL ENTRANCE AUTOMATION

Applications

Residential Houses & Societies, Private villas,
Farm houses etc.

AUTOMATIC SWING GATES

Automatic swing gates for homes are motorized gates that open and close by swinging on hinges, providing convenient and secure access to residential properties. They can be operated via remote control, keypad, or sensor, enhancing home security and ease of use. Our automatic swing gates are specialized for their smooth & fast operations with no compromise on safety & design.

AUTOMATIC SLIDING GATES

Automatic sliding gates are ideal for residential, commercial, and industrial properties where space is limited and secure, convenient access is needed. They offer smooth operation, enhanced security, and are space-efficient as they slide parallel to the fence or wall. Our automatic sliding gates are strong to protect your premises from an unauthorized access and works on a simple but effective mechanism by sliding on the either side of the opening.

DOCKING BAY AND WAREHOUSE SOLUTIONS

Applications

Warehouses, Industrial plants & Factories.

DOCK SHELTERS

Dock shelters are protective enclosures around a loading dock that seal the gap between the dock and a truck, providing weather protection and energy efficiency. They help maintain indoor climate control and protect goods during loading and unloading.

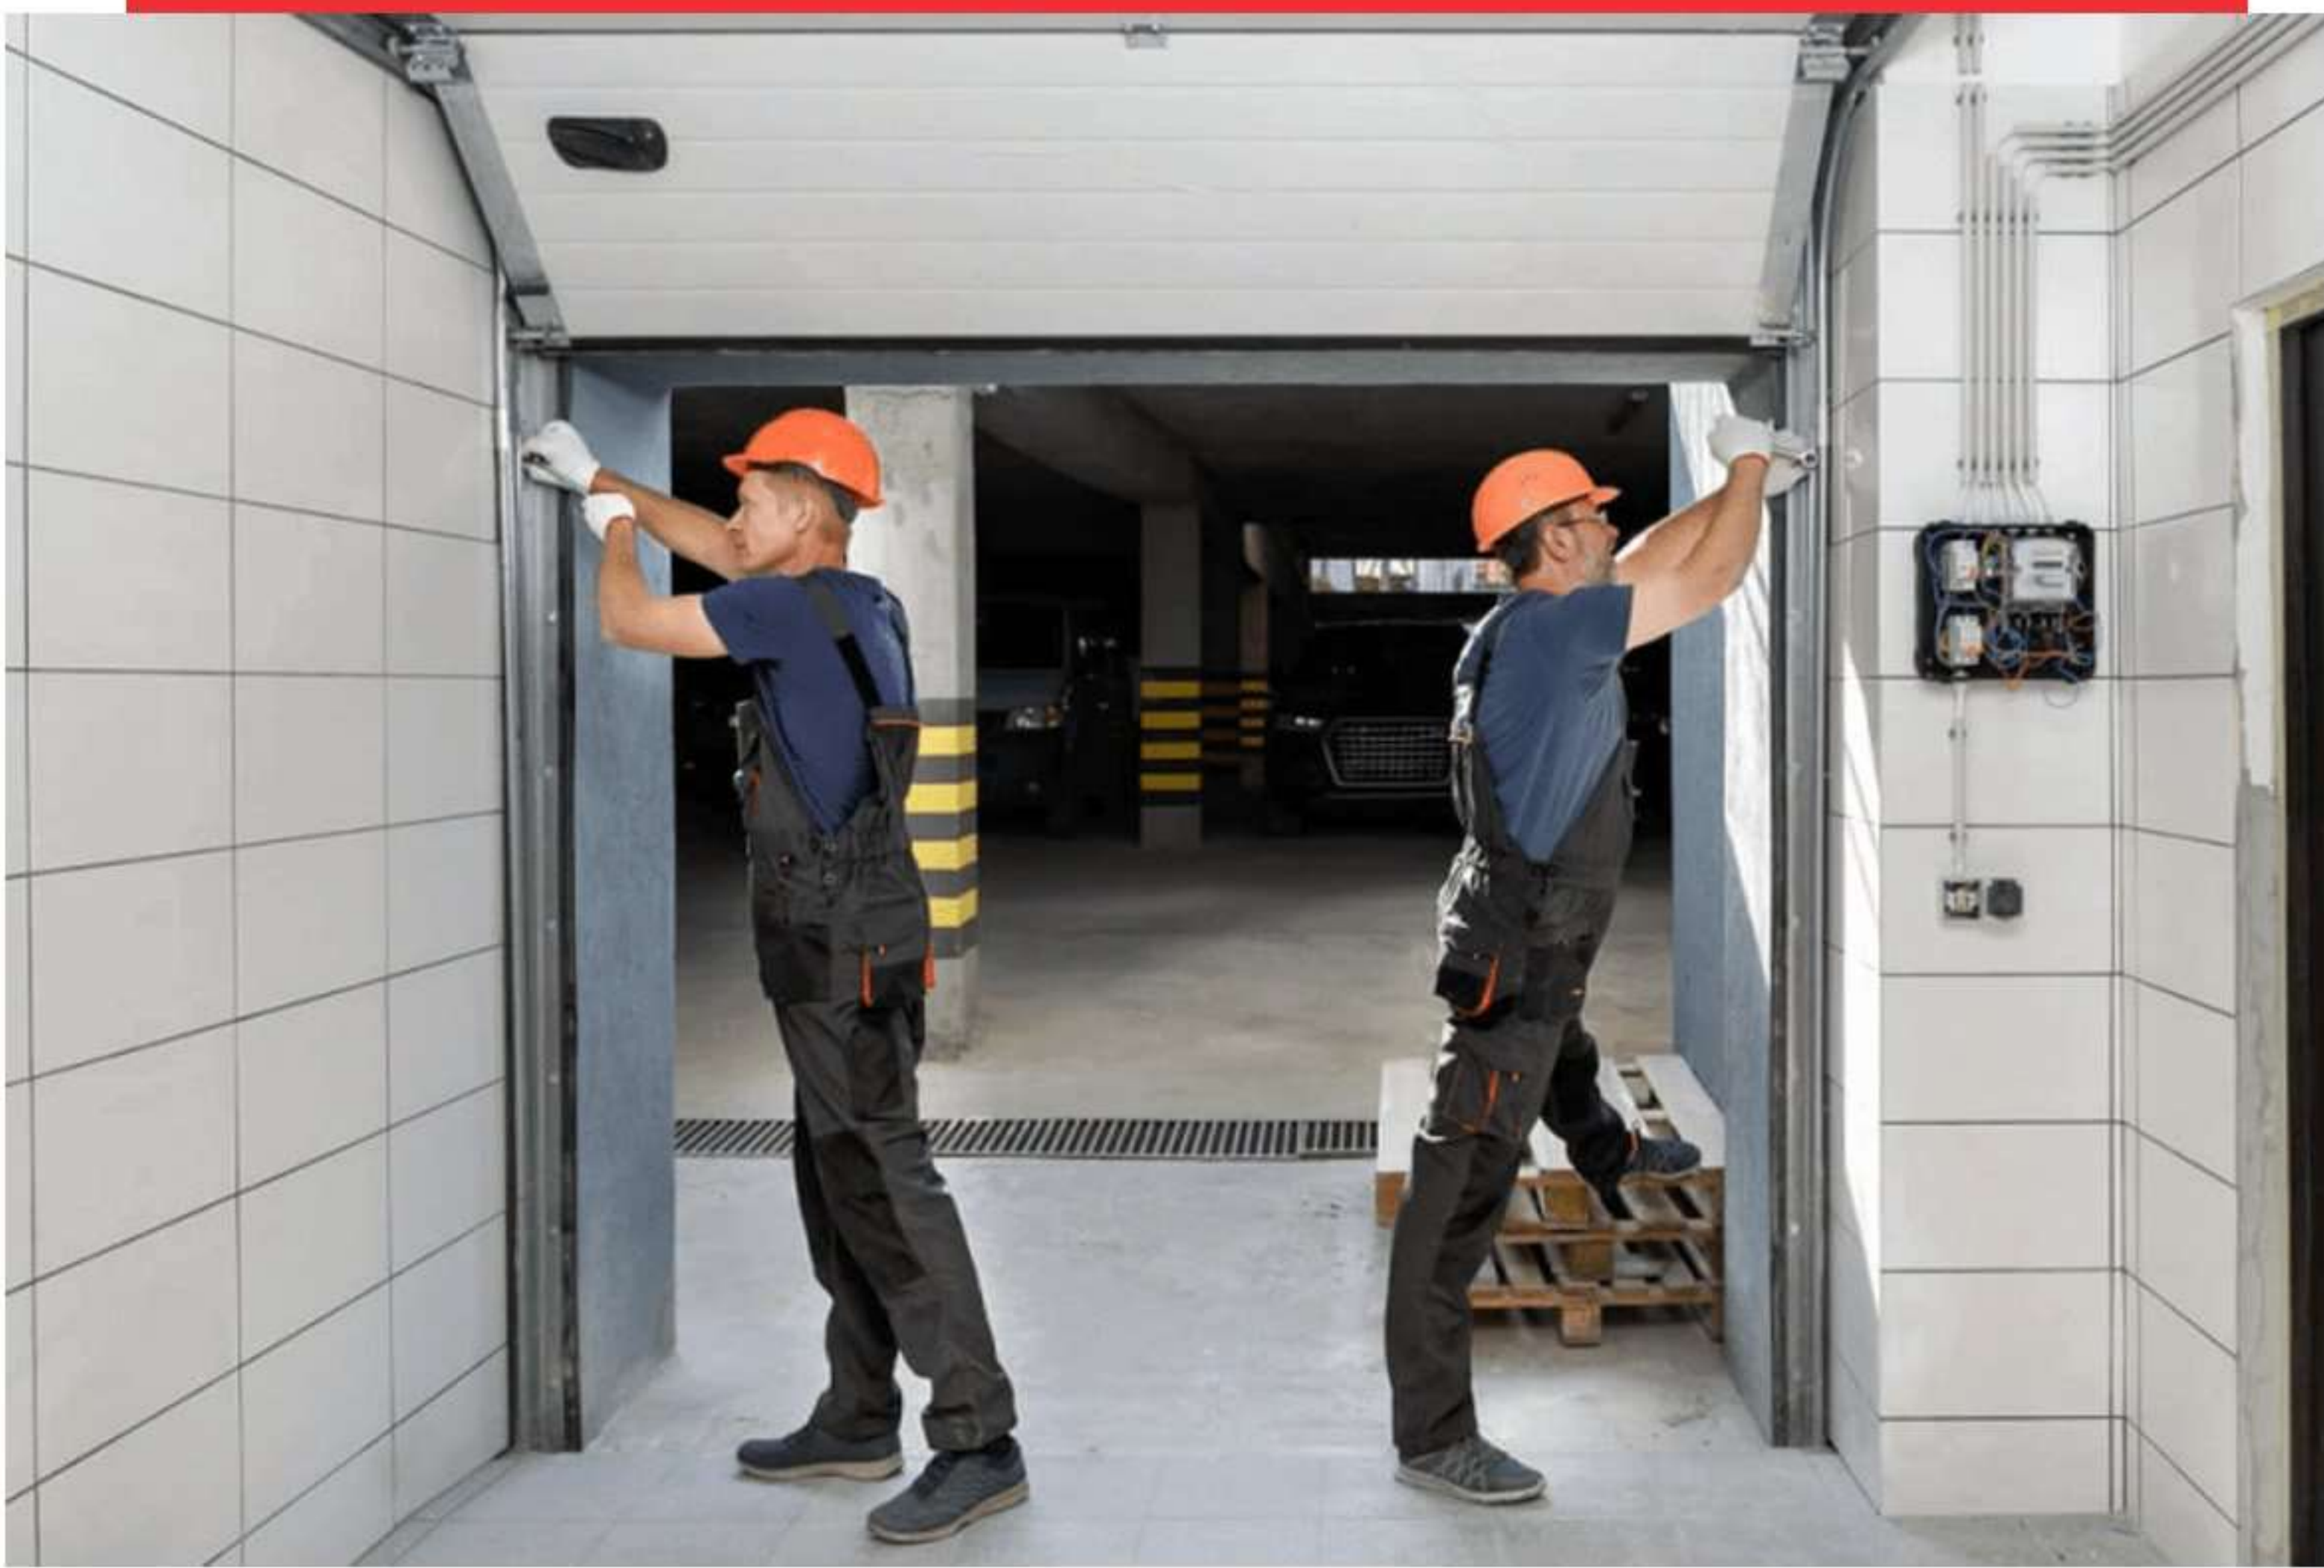

DOCK LEVELLERS

Dock levellers are adjustable platforms used at loading docks to bridge the gap and height difference between a dock and a truck, facilitating safe and efficient loading and unloading. They enhance safety and efficiency by providing a smooth transition between the dock and vehicle.

Our Team

The core strength of our organization is our dedicated and hardworking team, whose unswerving commitment towards excellence has led us to achieve an unshakeable position in the market. Our team is empowered with in depth industry knowledge and requisite skills that help us in the fabrication of a qualitative range of automated doors, gates, barriers, shutters, industrial doors and related accessories and spares.

» **Our distinctive and valuable approach to your automation solutions.**

We excel in creating value through strategic approaches, delivering optimal solutions for our customers' automation challenges.

» **Expert execution driven by extensive business experience.**

We draft plans based on simulations to assess potential risks and implement a variety of countermeasures to handle unforeseen situations.

» **Diverse and disciplined professionals poised to meet all customer needs.**

Our team of professionals, equipped with knowledge, skills, and determination, is dedicated to delivering the best solutions for success and consistently meeting customer expectations.

INFRASTRUCTURE

At our premises, we have established a highly advanced infrastructure facility equipped with state-of-the-art technology.

QUALITY POLICY

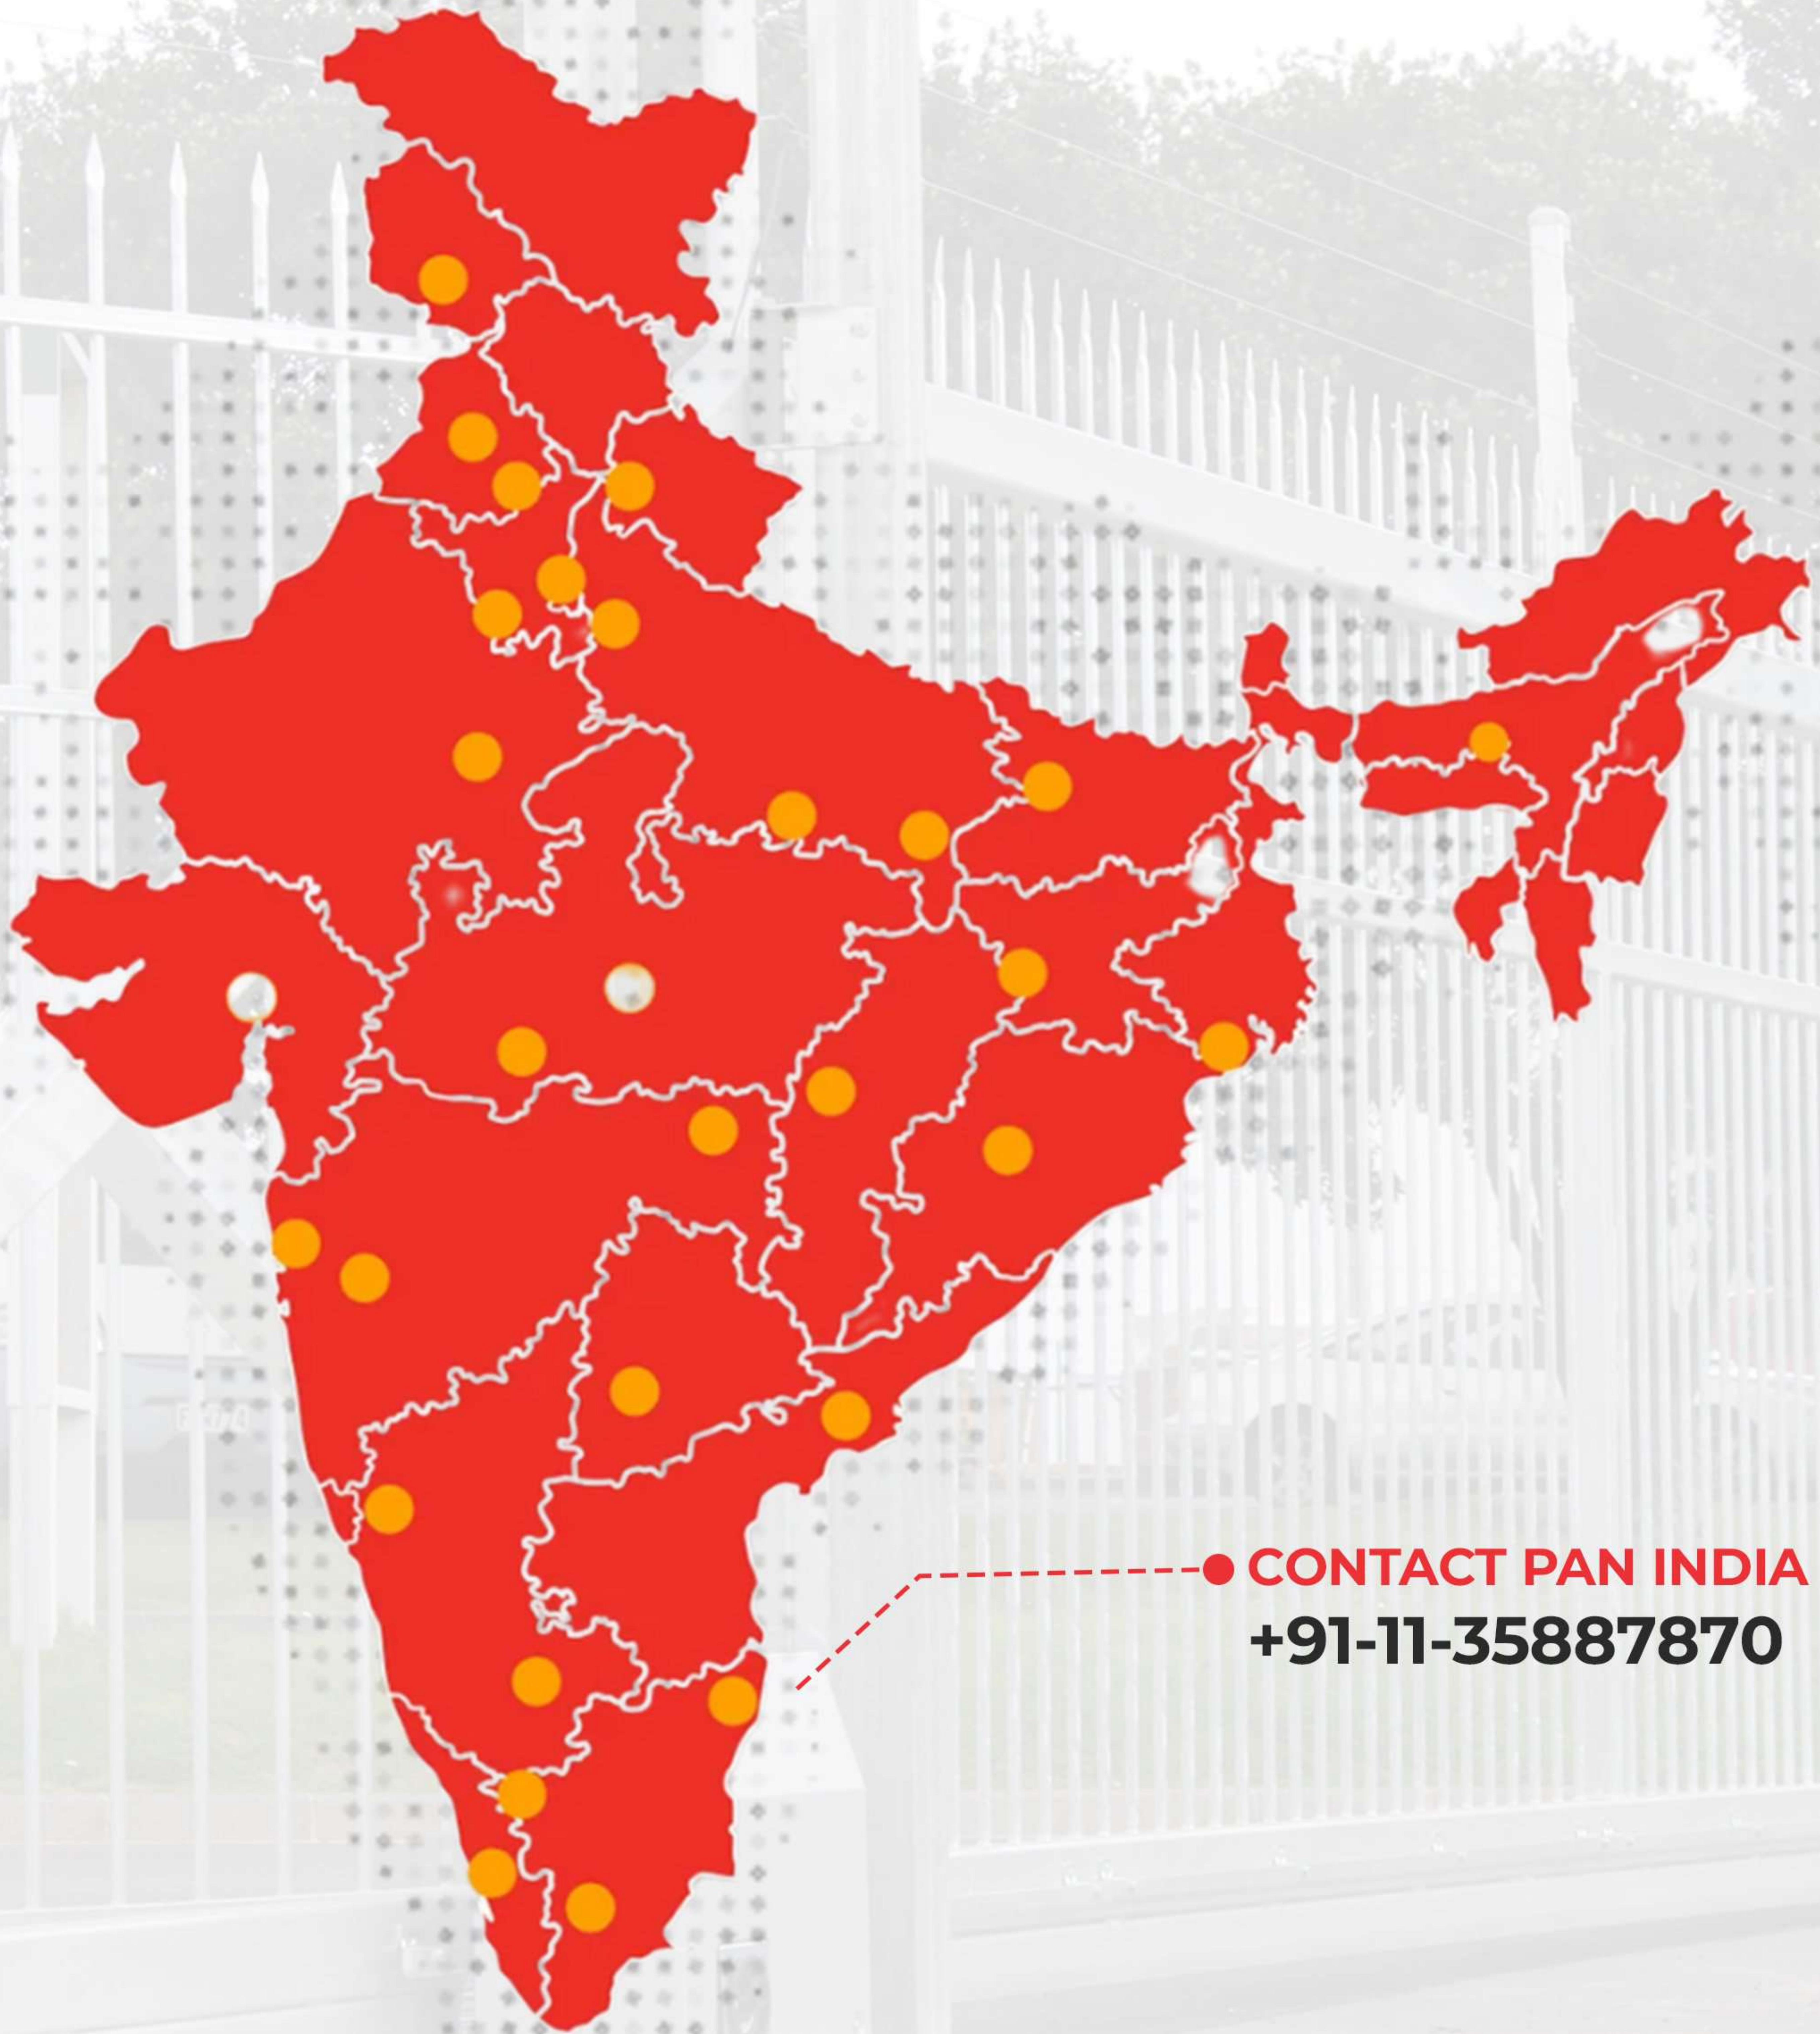

We are committed to delivering high-quality, state-of-the-art, safe, and energy-efficient solutions.

OUR COMMITMENT

At PortiQ Automations, we are committed to delivering excellence in every project.

Delivering excellence across the nation
